Please insert as a separate sheet the following Abstract of the Disclosure:

ABSTRACT OF THE DISCLOSURE

Pharmaceutical compositions comprise a therapeutically effective amount of an 8-hydroxy-1,6-naphthyridine-7-carboxamide of Formula (I), or a pharmaceutically acceptable salt thereof:

and a nonionic surfactant; wherein R<sup>1</sup>, R<sup>2</sup>, R<sup>3</sup> and Q<sup>1</sup> are defined herein. Compounds of Formula (I) are HIV integrase inhibitors, and the pharmaceutical compositions are useful for preventing or treating HIV infection or for preventing, treating, or delaying the onset of AIDS. The pharmaceutical compositions are typically administered orally, for example, in the form of capsules or tablets, and can provide good oral bioavailability. Methods for preparing encapsulated and tableted forms of the pharmaceutical compositions are described.
